EDUCATION

Post Grad Diploma, Advance Computing
CDAC, Pune
September 2011

- Ranked 1st in Institute with A+ Grade
- Awarded Best student of institute

BE, Electronics Technology
Pune University, Pune
January 2011
Specialty: Electronics and Telecom

- 72% with Distinction Class
- Member of DRDO sponsored project on computer vision

SANKET JOSHI

PROFESSIONAL SUMMARY

A software engineer with over 10 years of experience, specializing in leading cross-functional teams to deliver scalable software solutions. Excel in both front-end and back-end technologies, driving innovation, optimizing processes, and mentoring teams. Known for strategic thinking and a collaborative approach, leadership consistently results in successful projects, improved processes, and high-performing teams, ensuring efficient and maintainable code delivery. Organized and dependable candidate successful at managing multiple priorities with a positive attitude. Willingness to take on added responsibilities to meet team goals.

WORK HISTORY

January 2026 - Current

Freelance - Frontend Consultant, Pune, India

- In my role as a Freelance Software Engineering Consultant, I specialized in structuring front-end applications with modern frameworks like React and Angular. Cyprus
- Managed client relationships through regular check-ins and updates on project progress.
- Ownership of end to end deployment processes to enhance development efficiency. Involved in deep UI architecture
- Handled deployments, monitoring and telemetry requirement and guide team to maintain them Additionally, I engaged in pre-sales activities, estimating

project flows and managing engineering artifacts, while ensuring optimal application performance through diligent monitoring of metrics.

August 2024 - Current

EPAM Systems - Development Team Leader, India (Remote)

- Worked with zinnia as Development Team lead, leading team of 2 member independently
- Involved heavily into requirement gathering, customer handoffs, solutioning, sprint panning and actual development
- Worked in formulating and streamlining paper forms to digital forms using context based legacy approach .
- Suggested and implemented performance optimization using in house and third party strategies
- Proposed state management, virtualization, a11y action items and e2e test
- Implemented cypress test to reduce efforts on manual efforts vital workflow's e2e
- Guided co-workers for clean code and tried streamlining story structures alongside BA

June 2022 - February 2024

EPAM Systems, Inc. - Senior Software Engineer, Newtown

- Started contributing as key Front-end developer
- Took responsibility to work closely with feature set and transform requirements and solutions into maintainable code
- Bring up new ideas and improvements to existing source code and call them out in brainstorming sessions
- Introduced 20+ tech debts related to performance, security and accessibility for web development
- Led architecture discussions, driving innovation in software design and implementation strategies

January 2021 - May 2022

Synerzip - Team Lead, India (Remote)

- Started new account with customer by leading team of 4 UI developers (React, Cyprus, Node)
- Built application repo from scratch and helped client set up dev process
- Managed documentation and set up dev workflows
- Managed branching and added additional tooling for production benefit
- Wrote reusable custom hooks, services, and data layers
- Involved in performance optimization efforts for legacy and new codebase
- Touched upon legacy PHP framework
- Established clear performance metrics for the team which helped in tracking progress towards set targets effectively
- Coached team members in techniques necessary to complete job tasks
- Influenced positive change within the organization through strategic thinking, innovation, problem-solving abilities, and consistent leadership style
- Promoted a positive work environment by fostering teamwork, open communication, and employee recognition initiatives.
- Enhanced overall team performance by providing regular coaching, feedback, and skill development opportunities.

- Established clear performance metrics for the team which helped in tracking progress towards set targets effectively.
- Coached team members in techniques necessary to complete job tasks.
- Trained new team members by relaying information on company procedures and safety requirements.
- Influenced positive change within the organization through strategic thinking, innovation, problem-solving abilities, and consistent leadership style.
- Increased customer satisfaction by ensuring timely completion of projects and adherence to high-quality standards.
- Evaluated employee skills and knowledge regularly, training, and mentoring individuals with lagging skills.
- Led cross-functional teams for successful project execution while maintaining strong collaboration among team members.

May 2019 - January 2021

Synerzip - Senior Software Engineer, India (Remote)

- Helped team initially with suggestions on various UX/UI aspects so that stakeholders and team are in win-win situation
- Contributed to UI technically along with agile management responsibilities
- Contributed to adding facade microservices to fix security issues in record-breaking time. Worked closely with 6 JS dev to deliver crucial features
- Contributed to node based micro service backend to spin up APIs, PDF exports, and Excel imports. Optimized them to use Redis to have 30% boost
- Enhanced software functionality by identifying and resolving complex technical issues
- Worked with Front end techs - React, Typescript, Cypress

June 2017 - June 2019

Cybage Software Private - Senior Software Engineer, India

- Grabbed hold of Typescript, AngularJS, D3.js, Chart.js, started in Angular 2-team AngularJS project at TravelClick
- Mastered and got hold on Angular2+, Material UI, Bootstrap, Prime's, grunt
- Led team of 4 resources for complex UI screen in Angular 5
- Optimized code performance for improved user experience and system efficiency
- Developed scalable applications using agile methodologies for timely project delivery
- Regularly reviewed peers' code contributions, offering constructive feedback to enhance overall product quality

May 2016 - June 2017

Cybage Software Private - Senior Software Engineer, India

- Worked as a Vanilla JavaScript developer to build/fix lib code
- Worked to build advanced JS features using OOJS, HTML5, CSS, LESS, CANVAS, SVG
- Part of the FET Training department to teach and mentor developers on Perl, JS, OOJS
- Worked on a monitoring tool for a few months to monitor box health using Kibana, Grafana

October 2012 - March 2016

Cybage Software Private - Software Engineer, India

- Started working as Perl developer
- Built webpages for Athenahealth using Perl, CPAN
- Worked with cross-browser team to increase browser coverage for app
- Involved in cross-browser front-end development and testing initiatives
- Maintained existing software systems by identifying and correcting software defects
- Developed scalable and maintainable code, ensuring long-term stability of the software
- Implemented effective debugging strategies, resulting in fewer software defects and increased reliability
- Developed scalable and maintainable code, ensuring long-term stability of the software.
- Established efficient communication channels within the team, leading to better collaboration among members during project development phases.

TRAININGS AND MENTORING

Frontend and Cloud Track Trainer

Skill-Lync | Jan 2022 – May 2022 | 5 months

Partnered with **Skill-Lync** to design and deliver training programs in **Frontend Development, React, Node** and **Cloud Technologies**. Conducted live training sessions, created industry-relevant learning content, and helped learners understand concepts through practical examples and project-based learning. Mentored students on real-world use cases and guided them in building strong technical foundations.

Technical Trainer and Subject Matter Expert

Monjin | Apr 2021 – Apr 2022 | 1 year 1 month

Worked with **Monjin** as a **JavaScript Subject Matter Expert**. Conducted technical interviews and evaluated candidates for frontend and JavaScript-based roles. Assessed candidates on their problem-solving ability, coding fundamentals, practical JavaScript knowledge, and project readiness. Supported hiring teams by ensuring candidates were evaluated against real-world technical expectations.

In House Trainings / Cybage Software | Apr 2016 – Aug 2019 | 3 years 5 months

Delivered technical training programs for fresh graduates and lateral hires at **Cybage Software**. Trained engineers in **Frontend Technologies** and **Software Engineering Fundamentals** to help them become production-ready. Designed structured training modules, guided learners on coding standards, best practices, and real-world development workflows. Contributed to building a strong internal talent pipeline aligned with business and project needs.
